

Installation & Access Manual

Architectural Heritage of Algeria Project RAWASII

1. Instant Web Access

The application is fully hosted on **Railway**, requiring no local installation for the review process.

- **Official Website:** <http://download-rawasii.vercel.app>
- **Instruction:** Click the "Open on your browser" button to launch the platform directly in your web browser.

2. Mobile Installation (Android)

For supervisors testing the application on mobile devices:

1. **Download:** Navigate to the website above and select **Download for Mobile**.
2. **Installation:** Open the downloaded **.apk** file. Ensure "Install from Unknown Sources" is enabled in your Android security settings.
3. **Launch:** The app will be available on your home screen once installation is complete.

3. Technical Assets (Docker & GitHub)

While the app is pre-configured on Railway, we have provided all technical files for inspection:

- **Docker:** All files required to generate the Docker image (including the **Dockerfile**) are included in the repository.
- **Repository:** Access the source code at https://github.com/lemon-tea-1123/Rawasii_frontend. for the frontend repo as for the backend repo you will find it here https://github.com/lemon-tea-1123/Rawasii_backend

4. Usage Documentation

For detailed guidance on features and heritage data, please refer to the **Usage Manual PDF** available for download on the landing page.

This project is ready for immediate evaluation via the web link provided.
